

## I. SOURCE OF DATASET

The dataset is downloaded from the website

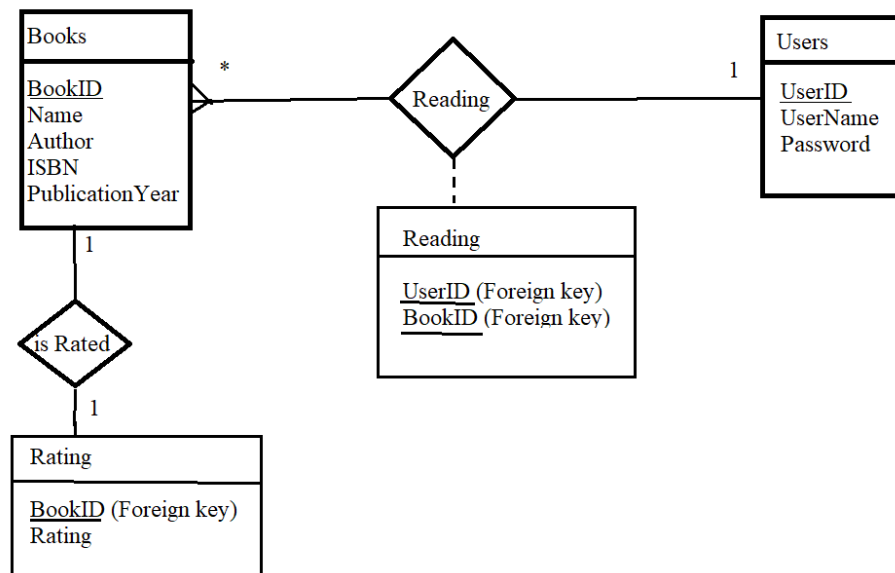

<https://www.kaggle.com/jealousleopard/goodreadsbooks>

This dataset contains the information of the books from <https://www.goodreads.com/>

The information in the dataset was trimmed to build the database for the application.

## II. DATABASE

The following is the ER Diagram for the database:

## III. BUILDING DATABASE

The database is built using MySQL Database Management System.

MySQL software installer can be download at <https://dev.mysql.com/downloads/installer/>

The MySQL queries to build the database is included in BookDB.sql or BookDB.txt in Database folder.
